

## 3.700" WM-44

We were asked by Northern Solutions in March, 2018 to supply them with several 3.700" diamond window mills. Our first (and only) design was the WM-44 shown at left. It was run in tests they ran in May and September, 2018 with the only details given to us being "cut full windows and were success".

We never heard from them again.

## 3.700" WM-44

A later test using Baker mills...photos but no details

A 2.8" Northern Sol job in Alaska....8' window 10' rathole...27 hours

## 3.700" WM-44

3.550" WM-44 run by Baker in Oman following a Baker mill run.
