

SC Mills SCH, SCL

We can fabricate almost any shape of steel mill face and set it using either Low Torque cutters shown at left and the High Torque cutters shown at right. They are available in 1/2", 3/8", and 1/4"

SC Mills SCH, SCL

The custom Low Torque SCL-Y is set with the 1/2" type of cutter that takes a controlled slicing or shaving type of cut that works well to cut Aluminum. This full hemispherical face shape also has low exposure 10mm PDC cutters to act as gage trimmers.

Aluminum Cutting

A more simple convex SCL is shown below
