Premium Tungsten Carbide Bodies Set With Cylinder PDC Cutters

The number of blades options 4, 5, 6, 8, & 10

The most popular cutter size is 8mm, but also available are 6mm, 10mm & 13mm

The MZ uses rounded gage lugs flush-set with diamond discs for safe use in tubulars.
They can also be made with extended gage or sleeve stabilizers for Turbine Applications
Fixed Ports can be arranged for almost any TFA as well as reverse circulation.

MZ Mills have been used with good results milling hard cement, hard scales, frac plugs,
and formations (non-directional).
